

When someone sent me the photos below, I had to look it up. **It's real.**  
In Brazil, people take spectacular pictures tempting fate by hanging from this famous rock.  
No photo-shops. These are real pictures:

Very brave?  
Very stupid?  
Or .....

The truth is, the rock is only a few feet above the ground.  
All that is required is the proper perspective!  
Remember this lesson when you read/view material on the internet.  
Sometimes, the truth is a lot different than what it appears.

NOW YOU KNOW WHAT FAKE  
NEWS LOOKS LIKE !

Remember this anytime you watch news  
on TV.

Here's one of several sites I found when I looked it up.
